

Bag Flattener – BK- BFT- Belt Sandwich

- The drive units are using 2 units of 0.4KW 3 phase motor to drive.
- The belt is using 2 ply PVC “AMMERAAL” belt.
- This design will have better shaping of bag compare to the roller type.
- The sandwich function can be by pass by activating the valve to lift up the upper conveyor.
- The drive pulley is diameter 139mm and take up diameter is diameter 119mm.
- This design will have better effect of flatten.
